ABOUT

Company

GCS Pvt Ltd is a trusted provider of IT, software, security, and smart technology solutions. We specialize in delivering innovative systems that combine AI, IoT, cloud, and automation to help governments, enterprises, and SMEs operate more securely, efficiently, and intelligently.

Our expertise spans software development, IT infrastructure, call center & BPO operations, data center services, AI-based solutions, and advanced surveillance systems. In addition, we design and deploy smart technology products including Safe City, Smart City, e-Challan, Emergency Response solutions and many more.

At GCS, our mission is to be more than a service provider. We are a strategic technology partner for organizations seeking transformation, security, and growth.

OUR **Vision**

To achieve global leadership in the services we offer, empowering businesses and communities with innovative, secure, and future ready technology.

OUR **Mission**

To deliver customer focused, scalable, and secure solutions that integrate IT, AI, and smart technology to improve lives, transform businesses, and ensure safer societies.

OUR Growth

10B+

PKR worth of projects already delivered / in hand (Pakistan)

100,000+

Devices installed in Pakistan

1500+

People spread across the country to serve.

10,000+

Rich exposure and experience of more than 10,000 sites deployed all over Pakistan.

03+

International Presence
USA | UAE | Turkey | China (In Progress)

300+

Satisfied enterprise clients already in Pakistan from the smallest to the largest

05 Offices

Countrywide presence, with offices in all provinces of Pakistan.

ISO Certifications

OUR Core Services

SOFTWARE & APPLICATION DEVELOPMENT

We design and deliver tailor made software solutions that align with your unique business goals. From concept to deployment, our expert team ensures scalable, secure, and user friendly applications that drive growth and digital innovation.

ARTIFICIAL INTELLIGENCE & AUTOMATION

Our AI-driven solutions empower businesses with predictive analytics, workflow automation, and smart chatbots, helping reduce costs and enable data driven decisions.

CLOUD SERVICES

Offering scalable and secure cloud solutions that ensure flexibility, efficiency, and business continuity, while enabling seamless collaboration, optimized storage, and future ready digital transformation.

CYBERSECURITY

We provide advanced cybersecurity solutions with AI-driven threat detection, firewalls, endpoint protection, and centralized monitoring to safeguard digital assets and ensure compliance.

DATA CENTER

We set up and manage modern data centers, offering hosting, storage, backup, and disaster recovery services with 24/7 monitoring and cybersecurity measures

OUR Core Services

SMART CITY

We provide Smart City consultancy, guiding governments and organizations on how to design, build, and implement modern urban ecosystems with the right digital infrastructure and components

INFRASTRUCTURE

We deliver secure, reliable, and scalable IT infrastructure services, including cloud migration, data storage, virtualization, and managed IT support.

INTERNET OF THINGS (IoT)

Connecting devices and systems to create smarter operations, improved efficiency, and real time decision making.

CALL CENTER & BPO SERVICES

Our 24/7 call center and BPO services deliver end-to-end support, including customer care, sales, lead generation, technical support, back office operations and emergency response services

ACCESS CONTROL & SMART SECURITY

We implement biometric, RFID, and smart card based access control systems with visitor management, providing complete control over secure environments.

OUR Core Services

COMMAND & CONTROL CENTER SOLUTIONS

We build centralized control rooms and dashboards for realtime monitoring, integrating IoT devices, surveillance, and emergency response systems.

WORKFORCE & ATTENDANCE MANAGEMENT

We deploy AI-powered solutions for facial recognition, geofenced attendance, and payroll integration, ensuring accurate workforce tracking.

EMERGENCY RESPONSE & COMMUNICATION

We enable fast emergency management with integrated call centers, mobile enabled apps, automated alerts (SMS/IVR), and live tracking dashboards.

GEOGRAPHICAL INFORMATION SYSTEM (GIS)

We develop interactive maps to plot and track resources, enabling better management and informed decisions.

FIBER OPTIC

Enabling seamless communication with high speed, reliable, and future ready fiber optic connectivity.

A low-angle, upward-looking perspective of several tall skyscrapers. The image is heavily stylized with a deep red color overlay and a dark, almost black, grid-like pattern that creates a sense of depth and architectural complexity. The sky is a solid, lighter red color.

WE OFFER

**Smart
Secure
Scalable Solutions**

OUR

Products & Solutions

AI-POWERED SMART E-CHALLAN SYSTEM

Automates traffic violation detection and challan issuance with AI-enabled cameras, government database integration, and mobile enforcement apps.

SMART SURVEILLANCE SYSTEM

Provides AI-based monitoring with facial recognition, vehicle tracking, and real time alerts to strengthen safety and reduce response times.

SAFE CITIES SOLUTIONS

An end-to-end framework combining CCTV, IoT sensors, and AI analytics to improve public safety, reduce crime, and enhance urban monitoring.

SMART CITIES DEVELOPMENT

IoT- and AI-driven solutions for modern cities, including e-governance portals, smart traffic systems, healthcare, education, and green energy integration.

OUR

Products & Solutions

EMERGENCY RESPONSE & COMMUNICATION

Centralized emergency management platform with real time dashboards, GPS tracking, and automated communication systems to improve response speed.

CALL MANAGEMENT SYSTEM

Secure communication platform with biometric/facial authentication, encrypted audio/video calling, automated IVR, and monitoring tools.

AI-BASED ATTENDANCE MANAGEMENT

Smart workforce solution with facial recognition, geo-fencing, HRMS integration, and mobile apps for both office and remote staff.

SITE MONITORING SOLUTIONS

Provides centralized dashboards for asset tracking, IoT device monitoring, multi site surveillance, and customizable alerts for compliance and safety.
